

Highlights of July 12.

We continued with the presentations from the provinces and units.

The sisters from Korea presented two symbols: To the right is a lamp, representing the presence of Jesus. To the left is a bowl of water to which they added salt. The salt permeates the water but is invisible, representing the discrete presence of Mary in all that we do.

The presentation of the African Unit. Their chosen symbol is a batik: Two women working together with their feet firmly planted on the ground, balanced, bringing the casaba to the right consistency for good nourishment with the help of the mortar. From time to time the casaba paste needs a sprinkling of water, provided by Mary. The women carry new life in the children sleeping on their backs.

Other provinces and units also presented their reports (USA, Japan, Italy and India). Japan offered each capitulant a little doll which when knocked over always rights itself. This is a good wish for the Chapter.

The General Administration also presented its report later in the afternoon, which will be discussed in the days following.
